The i-Spi-CallFree2 is a GSM remote control switch that is activated by calling its mobile phone number. There are no call costs incurred as it will reject the call without answering and switch on the device connected to it. It can also be connected to PIR's, burglar alarms, water level or leakage sensors, Carbon Monoxide detectors, etc. and will send a text when an alarm condition is triggered. Contact FSL for further application information.

Product Features

- No expensive keys or remote controls to lose, wash or damage – your mobile phone is the key/remote control
- Can also be used to turn on heating, lights etc. remotely
- Alarm input can be used to link to PIRs etc. for remote monitoring
- Numbers can be deleted immediately as easily as sending a text or making a call
- No call charge to operate as the call is never answered
- Remote operation from anywhere in the world at any time
- Compact aluminium design with mounting holes, for easy mounting inside gate control panel
- Optional weatherproof IP65 enclosure
- Connecting the Electronic Lock or Electricity equipments

Technical Specifications

Rated Voltage: 12VDC 1 A or 220VAC

Working temperature: -10-+60C

Storage temperature: -20-+60C

Relative humidity: 10-90%, No condensation

Work frequency: 900/1800MHz

Communication protocol: GSM PHASE 2/2+ (include data service)

Wired Inputs:2

Relative Voltage of the Output Relay: 3A/240V AC

Net Weight: 0.50Kg
